In the district court of Sedgwick county, Kansas, Thes. C. Tay & Co., composed of Thos. C. Day and W. C. Griffith, partnership dofter futerness under the firm hause of Thus, C. Pay & Co., plaintiff,

The interstate commerce law forbids railways to charge openly or by device any one person a greater or less compensation for any service rendered in the transporration of passengers or property than it charges for a like and contemporaneous service. This is one thing that this law forbids. It does not, however, prohibit one company from giving to its patrons better services than another. Why then patronize the railroad that offers the interior train service when for the same amount of money you can obtain superior service-ride a less number of miles and still reach the same points. The railways entering Wichita and offering these inducements should be well patronized. The Missouri Pacific Ry Fort Scott Route offers such inducements as mentioned above and a great many more which space will not permit t enumerate. If you are not aware of this fact—that the Missouri Pacific radway has elegant train service such as the latest improved reclining chair cars and the modern improved Puliman palace sleep ng cars, give it a trial and you will alway thereafter take the popular route. It is the short line to St. Louis (by 48 miles) as well as to all Colorado, California and Washington Territory points. Before purchasing your tickets call at the city ticket office, 137 North Main street. E. E.

OVERWORK THAT KILLS.

A DISEASE THAT IS BLIGHTING THE LIVES OF BUSY MEN.

It Is Incurable, but Men of Small Mental Caliber Need Not Fear It-Women Fur nish Less Than One Per Cent. of the Cases. No Other Land So Cursed by It.

Few weeks go by now in which the comnunity is not startled by the intelligence that some men of prominence has suddenly secome insane. Some act of sudden and unsome astounding delusion compels attention to his condition. Then, friends and relatives remember he has been for some time "acting queerly" and the question, "How long has his mind been affected?" is one that awakens much excited interest, especially among those having business relations with him, or concerned in his estate. "Rest and quiet will speedily restore him," say his friends, and so physicians profess to hope. He is secluded in an asylum, or in some private rural re-treat. The next that is heard of him is that experts in cerebral affections have pronounced his disease "paresis." Paresis horror of the age; a slow death in life; a malady as incurable and inevitably fatal as enrosy-that is paresis.

Perchance, after a time, the victim may seem to rally, to regain his mental control, and hopeful friends will doubt the correct ness of the physicians' diagnosis. But in a few months the reaction comes, darker and darker the cloud settles down upon the afflicted mind, more and more feeble grows the body, slowly and surely life fades out. How many instances of this fatal progress night be cited, among men not only locally prominent, but of national reputation as playwrights, actors, merchants and finan-cters, were it desirable to call the painful roll! At least three, whose names are known all over the land, are now in or near New York, awaiting the certain end, and there is not an insane asylum in the country in which there are not numerous cases, of per sons of minor individual importance, doomed

to death by paresis. Generally the disease runs its course in about three years from the time that it unquestionably declares itself, but there are ises-where it is induced altogether by alcoholism-in which the end is delayed as much as ten years, the greater part of which time the victim is a flaccid, paralyzed, drooling, helpless and hopeless imbecile or tort-ured by the saddest hallucinations—a condition from which death would seem to be a happy release.

THE HISTORY OF PARESIS. As long ago as 1672 this peculiar variety of cerebral affection was observed, but until fifteen years ago it was rare and had not been so closely studied, accurately defined and the knowledge concerning it so systematized as now. Within ten years it has constantly and with alarming rapidity increased in the United States, until now it is not too much to say that it is our national terror. In no other part of the world is it so frequent. And its blight is most upt to fall upon these who are brightest, most mentally active. Stupid people have little reason to fear it, if they keep sober, nor have women. Not one per cent, of the cases are those of females. The average woman does not dangerously strain her brain, but many men, in the eager com petition, rapid life and over excitation of brain and nerves common to American existence, do so-and invite paresis.

Dr. Allan McLane Hamilton, who is recognized as one of the highest authorities upon Notaries Records mental diseases in this country, when con suited a few days ago upon the subject of paresis, for the purpose of this article, said: "I see a great deal of it, in various asylums Loan Agent Books and institutions, as well as in my private practice, and recognize the fact that it has been, during ten years past, steadily and alarmingly increasing. It is a disease inci-dent to the rapid life of this country. In a majority of cases it is directly dependent upon vice and not upon actual overwork alone. It is the fashion nowadays to call all

As a rule the disease attacks persons who are primarily dissipated, and with that dissipation have a certain amount, probably excessive, of irregular mental work. Nearly always it begins with some depression, URINARY, RIDNEY&BLADDER these, Gonorrhea, Gleet, and Stricture, are quickly for a variable time, ensures extravagance of deas, which is an important feature of the

"The so called 'illusions of grandeur now character, the victims having vast confidence in their own powers. Some of them claim to possess the entire wealth of the world and more or less governed by this delusion give away presents most extravagantly, spend their money in the most reckless way and cherish the wildest schemes. Others Scale Books believe that they are specially appointed by God to perform tremendous deeds, or achieve great things, such as the establishment of new faiths, or the founding of new orders, and deem themselves endowed with the power of working miracles. Their schemes are always colossal. The character of Colparesix. His eye water scheme is distinctively that. Another notable fact is that these vast illusions are meant for the good of | Magazine Binding burnanity; that those cherishing them to be great benefactors, and they are fond of

tion of these different filusions he is more er less influenced by his surroundings, and is very apt to become violent and abusive when his illusions are questioned or his powers doubted.

As the disease progresses in the brain, the Lithographing of all Kinds body wastes away, becomes feeble, the muscles are powerless and a condition of paralysis sets in. Toward the end the patient, incapable of motion or consciousness, droois saliva from his open mouth, sees nothing with his lack luster eyes, and gradually fadaway.
